

WESTHAVEN PARK

Landon Bone Baker Architects

Chicago, Illinois

Cook County

Westhaven Park is located on the West side of Chicago, on a site bounded by Lake St and Washington St and Wood St and Wolcott St - on the former site of the CHA Henry Horner Homes high rises. Westhaven Park is currently in the planning stage and will provide around 215 new housing units to the site. The site plan will incorporate a mixture of for-sale and rental housing units in a variety of bedroom counts and unit mixes. Each block will have a distinctive pedestrian and urban emphasis; the Lake Street corridor will be developed with live-work lofts to promote activity along Lake St., Maypole Ave. will be developed as a pedestrian access street to connect the site to the Ashland El stop, and the housing along Washington St. will establish a strong front "edge" to create an identity and boundary to the site.
